ABOUT

Software Engineering student building real-world web applications. I develop full-stack projects and focus on simple, usable, and practical solutions. I learn by building and continuously improving through my own projects.

TECHNICAL SKILLS

- **Frontend**: React, TypeScript, JavaScript, Tailwind
- **Backend**: Node.js, Laravel
- **Database**: PostgreSQL, Firebase
- **Tools**: Git, GitHub, Vercel

LANGUAGES

- English
- Turkish

MY PROJECTS

Asiltürkmen.com
Personal portfolio

- Designed and developed a modern portfolio platform to present projects, technical skills, and product-oriented work
- Ensured responsive design for smooth browsing on both desktop and mobile devices
- Tech: React, TypeScript, Tailwind CSS

NedirBeo.com
Cypriot Dialect Sharing Platform

- Built to preserve and pass down the Cypriot dialect by collecting expressions from older generations and making them accessible to younger ones
- Developed as a full-stack application independently, covering frontend, backend, and database design
- Implemented using modern web technologies to ensure a clean, accessible, and user-friendly experience
- Tech: Laravel, React, TypeScript, Node.js, PostgreSQL

HesAppcim
Shared Expense Tracking Platform

- Built to simplify shared spending by helping groups track expenses and balances in one place
- Extended beyond the web with a WebView-based mobile structure for Android and iOS accessibility
- Tech: Next.js, TypeScript, Firebase, Firestore, Tailwind CSS

OTHER PROJECTS

- Tokenstudies.com
- Nottakip Telegram Bot
- Flowers webpage
